

## SITTING KNEES H1 - H2 - H3

Wellbeing & ergonomics at work

Coating: Conductive vinyl

In accordance with IEC 61340

### TECHNICAL CHARACTERISTICS

**Inclined anatomical** seat adjustable in height by cylinder pneumatic gas with seat cushion

**Support-knees / shins** articulated on specific rubber suspension, height adjustable independently of the seat (3 different positions possible by screwing).

The distribution of the mass of the body on **the inclined seat** and the trapezoidal knee / shin support releases the pelvis that tilts forward by relieving the back tensions and naturally straightening the spine.

Polished aluminum 5-spoke base Ø 668 mm mounted on conductive wheels

High density foam without CFC,

Net weight: 8.7 to 8.9 kg depending on model

Seat bottom : L 450 x D 400 mm

foam 40 kg/m<sup>3</sup> thickness of 40 mm

Knee Support: L 460 x D 270 mm

foam 50 kg/m<sup>3</sup> thickness of 60/120 mm

02-0402-00933	Model H2 / Seat height 500 - 690 mm
02-0402-00934	Model H3 / Seat height 610 - 860 mm

## SITTING KNEES B1 – B2

Wellbeing & ergonomics at work

Coating: Conductive vinyl

In accordance with IEC 61340

### CARACTERISTIQUES TECHNIQUES

**Inclined seat** adjustable in two positions by screwing and adjustable in height by chrome pneumatic gas cylinder and driver with seat cushion, **class IV - DIN 4551**.

**Articulated knee rest** on specific rubber suspension, adjustable height independent of the seat (3 positions possible by screwing)

The distribution of the mass of the body on the inclined seat and the knee rest frees the pelvis that tilts forward while relieving back strain and naturally straightening the spine.

Piètement 5 branches aluminium poli Ø 668 mm monté sur roulettes conductrices

High density foam without CFC.

Net weight: 9.1 to 9.4 kg depending on model

Seat:	L 400 x D 340 mm	foam 45 kg / m <sup>3</sup> thick 60 mm
Knee rest:	L 460 x D 270 mm	foam 45 kg / m <sup>3</sup> thick 60 mm
